

App. No. 10/656,080
Amendment dated June 8, 2006
Reply to Office Action of March 8, 2006

Remarks/Arguments

Claims 2, 3, 10-12, 14-22, and 24 are in the application. Claims 11, 14, 15, 16, 19, and 21 are in independent form. Claims 19-20 are allowed. Claims 11 and 14-16 would be allowable if rewritten into independent form to incorporate the limitations of the rejected base claims and any intervening claims and to overcome objections and rejections under 35 USC 112, 2nd paragraph.

Applicant has rewritten Claims 11 and 14-16 to incorporate the limitations of the rejected base claims and any intervening claims. Applicant has also corrected the informalities in Claims 14 and 21. The rejection under 35 USC 112, 2nd paragraph of claim 1 has been corrected in the portions of claim 1 that were incorporated into claims 11, 14, 15, and 16. Claims 14, 15, and 16 recited "remotely controllable aircraft" and amended claim 14 incorporates the limitations from cancelled claim 13. Applicant believes that these claims are now in condition for allowance. Claims 2, 3, 10, 12, 17, 18, 22, and 24 are amended to depend from allowable base claims.

Applicant submits that all non-allowable claims have been cancelled, and all remaining claims are either allowed or indicated as allowable.

To avoid any possible misinterpretation of the claims, applicants note that the terms AC and DC are used in specification and claims in the following sense:

All voltages/currents can be decomposed into a DC component and an AC component.

The DC component is defined to be the average value of the voltage or current over all time.

The AC component is the voltage/current without the DC component.

This complies with the standard definition within electrical engineering.

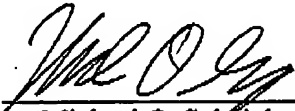

Other meanings are excluded.

App. No. 10/656,080
Amendment dated June 8, 2006
Reply to Office Action of March 8, 2006.

Applicant submits that all claims are now allowable and respectfully requests timely
issuance of a Notice of Allowance.

Respectfully submitted,
